CITRA-BLITZ DATA SHEET

CLEANER AND DEGREASER

APPLICATION GUIDE

GENERAL CLEANING:

- Light spray on affected areas, wipe with a damp cloth.
- Suitable for kitchen benches, floors, grease traps, range hoods, drains, shower screens, toilets.

ADHESIVE REMOVAL:

- Spray Citra-Blitz on the affected area, allow to stand for 3-5 minutes.
- Coated stickers, may require the top surface of the sticker roughed up to allow penetration of Citra Blitz.
- Rub until adhesive is removed.

MACHINERY & INDUSTRIAL DEGREASING:

- For any solid crusted build up, rough the surface up with a wire brush to allow Citra-Blitz to penetrate.
- Allow to stand for 5-10 minutes, use a high pressure cleaner to easily remove the build up.

BITUMEN REMOVAL:

- Spray Citra-Blitz on affected area, within a couple of minutes of application use a stiff bristled broom to work in Citra-Blitz
- For even faster results, follow up with a high pressure cleaner (hot if possible)

ELECTRIC REWINDS:

- For decarbonising electric windings, spray, leave for 10 minutes and high pressure clean off.
- For larger windings contact your Woolube Account Manager for detailed instructions.

THREAD DOPE & ANTI SEIZE REMOVAL:

- Spray Citra-Blitz neat onto threaded area with build up,
- Use a soft brush to work Cita-Blitz into the threads, wipe off with a dry cloth.
- Citra-Blitz will not affect the graph.

PHYSICAL PROPERTIES

Appearance : Clear Liquid
